L. Dis. No 895-22-E5.

Sathon Mangalore, , *dated the* 28th February 1922.

From (*Name*) M.R.Ry. A. Ramacha Nedungadi, Avl., B.A., B.L.,

(*Designation*) Collector of South Kanara.

To The Secretary to the Government of Madras,

Local Self Government Department.

Sir,

I submit the following report on the plan of operations for the hot weather as required by para 3 of G.O.No. 1076-P, dated 5th October 1905.

2. During the last year, there were 34 attacks and 28 deaths from plague in the Mangalore Municipality and four attacks and four deaths outside it in the villages of Kilpadi Mangalore Tota and Tannirbhavi of Mangalore Taluk. These three villages are not plague infected now. In this year, there has been so far only one attack and one death in the Mangalore Municipality.

3. The full batch of 20 coolies was employed throughout the last year for rat destruction and the system of reward over a certain minimum continued as before. The same number

of coolies are working in the Municipality even now and will be sufficient for the work during the hot season. The District - Medical and Sanitary Officer proposes to employ them on systematic trapping of rats in the most infected localities during the hot -- weather. The baiting with Barium Carbonate which was carried on extensively last year will be tried again and the voluntary evacuation of houses in infected localities and inoculation of contacts with anti-plague vaccine during the hot weather will be advised. -

Collector.
